Agenda features

Speaking sessions

Our lectures show the latest technologies and possibilities for implementing more efficient information security. Full focus on implementation - our speakers ensure that their presentations impress with their practical relevance and feasibility.

Case studies

Our cyber security use cases report like the most successful ones. Companies think, feel and implement information security. In the Duet format, established solutions are presented from two different perspectives; there is no recording for these stories.

Community

Parallel to the lectures, discussions with exhibitors take place, so we qualify the challenges in advance of the event and bring together participants who have a common topic - both sides benefit.

Mastermind - restricted to buyers

It's about knowledge in the company and growth as a person - nothing else. There is acquired practical knowledge as further training in the mastermind. Takeaways are developed in small groups and can then be implemented directly in the company.

Hotseats - restricted to buyers

Direct contact with other participants in confidential one-on-one conversations - the doors are locked and access is only reserved for users. On site, all participants will receive detailed information about the location and a short introduction to this networking module.

Confidentiality

What happens at mysecurityevent stays there: this is a LIVE event behind closed doors.

No recording, no repetition

Our mission is to make the digital world even safer by always connecting new experts with the community at our events. That's why every subsequent mysecurity event takes place in a new city with current topics and a new field of participants.

17:00

Checkin

Registration & handout of mysecurityevent batches already pre-event.

17:30

Pitch Night

N26 - Max Imbiel
How not to pitch the CISO.

HUGO BOSS - Stefan Baldus
Insourcing SOC - why we do it differently.

Miltenyi Biotec - Horst Moll
Opportunities and risks with AI & security.

Cordaware - Benedikt Stürmer-Weinberger
Be ready for remote work without VPN.

CITTI - Oliver Rother
8mins2doom - critical processes & shadow IT.

adidas - Michael Schrank
Take risks to reduce the risk.

Exabeam - Felix Blanke
Fast & powerful behavioral analysis.

Burda - Hermann Huber
From uniform wearer to CISO.

GEA - David Säger
Integration of data protection management.

Ontinue - Fred Schmidt
Redefining non-stop cops

AI Universe - Florian Hübner
More innovation, efficiency & sales with AI.

Visage Imaging - Gideon Knocke
Don't fear what's new.

INFODAS - Sebastian Dännert
With whom does a CISO have to drink how much coffee?

DB Zeitarbeit - Harald Borck-Essel
Chatbots or bot chats? Chatbots in recruiting.

EnBW - Dr. Michael Ebner
Cyber alliances for better cyber resilience.

Deutsche Rentenversicherung - Marie-Luise Wegg
Diva alert - Underrepresentation of women as a gateway.

Checkmarx - Shirin Brinkmann
Protecting Enterprise Application Security from Code to Cloud

Microsoft - Dr. Georgia Papaioannou
How does it feel to be an attractive target for a cyberattack?

LastPass - Max Schmiederer
Like a libero - strengthen your defense with password management

GreenTech Solution - Paul Wormland
GDPR revolution: Out of the data chaos!

18:30

Speaker Dinner

On our invite to awesome food, ice cold drinks & networking.

20:00

Networking

Opportunity to connect to other attendees - open bar, open end.

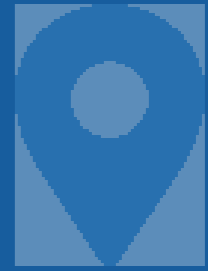

Meeting point

Business Club at ground floor.

Adress:

Deutsche Bank Park
Mörfelder Landstraße 362
60528 Frankfurt am Main

What is the Pitch Night?

Stream will take place live from the location on social media and gives event participants the opportunity to use our digital reach. A merciless counter runs that limits the moment on stage to 1 minute.

Participation opportunities:

- Employees wanted? Receive applications.
- The company has a great product? Increase visibility.
- Share something with the community? Here is your opportunity.

Submit a suggestion now:

marc.plewnia@mysecurityevent.de

Click here for highlights 2023.

08:00 **Checkin**

08:30 **Opening**

Moderation - introduction to program
Benjamin Bachmann CISO

08:35

Markus Bentele
CIO

Michael Simon
CIO

Case: IT security at any cost?

- How much can/must IT security cost?
- How do you not only take the users with you?
- More sales & more budget in the recession

09:10

Christoph Gruber
Head of IT Security

Harald Borck-Essel
CIO

Case: cloud

- The all-round, worry-free package
- We're going to the cloud.
- Everything we need is already there.

10:15

Networking break

09:45 **Hotseats**

Networking: restricted to buyers

10:15 **Networking break**

10:45

Martin Dombrowski
Enterprise Sales Executive

Speech: micro-segmentation

- What is the cook doing in the treasury?
- Reducing the attack surface in environments
- Strengthen regulatory compliance
- less maintenance and operating costs

11:20

Philipp Pelkmann
CTO Cyber Compare

Case: cybersecurity benchmarking

- Efficient price-performance comparisons
- Overlaps, consolidation potential and gaps in the security stack
- Insights to buy more security for your budget

11:55

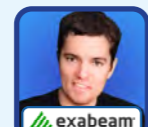

Liran Cohen
EMEA Director

Speech: the modern darkweb

How Impactful Intelligence Helps Organizations Mitigate Cyber Risks & Gain Better Visibility On The Full Attack Surface.

12:25 **Lunch**

13:25

Felix Blanke
Senior Manager Sales Engineering

Speech: SIEM

- Why false promises mean a false sense of security.
- The truth? Violations happen and there are no magic bullets.

14:00

Roland Stritt
VP Central EMEA

Speech: generative AI - risks and benefits for cybersecurity

- Where are the risks for cybersecurity posed by AI?
- How do attackers leverage AI, and what is generative AI?
- How can we use AI for protection against cyber attacks

08:00 **Checkin**

08:30 **Opening**

Moderation - Einführung ins Programm
Swantje Westpfahl CEO

08:35

Chris Lichtenthäler
Director Global Information Security & Compliance

Wolfram Nötzel
CIO

Case: cyber resilience

- Automation - people - technology
- A look at cyber resilience from a perspective of a federal agency and a corporation.

09:10

Max Imbiel
Co CISO

Case: security 3.0 - insights from modern medicine

In security, much like in medicine, we often only react when it's too late - after we've been hacked or fallen ill. What can we do in our security practices to apply healthier/safer working methods by leveraging insights from the concepts of Medicine 3.0?

09:45 **Hotseats**

Networking: restricted to buyers

10:15 **Networking break**

10:45

Sascha Kreutziger
Leiter Business Development

Speech: increasing resilience between business and IT

Increase the resilience of the organization, employees and employees and IT. Clear goals and procedures - supported by tools. From requirements to audit management.

11:20

Frank Schwaak
Field CTO EMEA

Speech: backup != cyber recovery

- Why prevention alone is not enough.
- Why the 6 functions of the NIST CSF 2.0 framework must be in balance.
- „Backup“ is not the same as „cyber recovery“.

11:55

Dr. Barbara Frank
Cyber Security Awareness Manager

Katrin Schummer
Regional Manager DACH

Case: cyber security awareness@E.ON: a holistic approach for a broad audience

Which solutions are suitable to reach the majority of all employees? What measures are needed to create audience-specific awareness? We illustrate this through our collaboration with Hoxhunt.

12:25 **Lunch**

13:25

Hannes Schneider
Manager Sales Engineering

Speech: break the attack chain

- Cyber resilience as a dynamic protective shield against modern threats
- Insights into the individual phases of the attack chain
- Each phase an opportunity to strengthen cyber resilience

14:00

Alexander Koch
VP Sales EMEA

Speech: deliver phishing-resistant MFA with passkeys

Choosing the right passkey implementation for organizations to ensure user-friendly authentication at scale

14:35

&

Case: visibility is coming..

Management and minimization of external cyber risk through:

- Visibility of the external attack surface incl. organizational structure
- Visibility of individual assets' risk with confidence value
- Effective prioritization enabled by an extended risk score for each Security Issue
- Focus on and faster remediation of truly critical external risks

15:10

Speech: the battle for the truth

The danger of disinformation and fake news based on real case studies.

15:40 Networking break

16:10

&

Case: ISMS anchoring in state authorities

Anchoring an ISMS from 2 perspectives:

- Internally by the management and
- Externally from the perspective of external consulting.
- Creating real awareness with sustainable acceptance

16:45

&

Case: IAM

- Operational challenges in a zero trust environment
- Software development process & regulations
- Leadership and acceptance: IAM as added value

17:20

Speech: zero trust network access

- SD-WAN, Firewall, SWG, CASB and ZTNA in one framework for secure connectivity of cloud and hybrid environments
- Customer portal on a uniform data platform

17:55

&

Case: password management

- NIS2 compliance
- passwordmanagement in times of passkeys
- adoption - security vs convenience

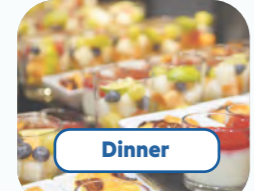

18:30

Panel: more revenue with security

- Marketing - customer loyalty - RoSi
- Example: friendly hacker
- Example: free product & social media marketing

19:00

14:35

Speech: demystification of Generative AI in Cybersecurity

The hype around ChatGPT focuses on AI. We are discussing three exciting topics related to AI in cybersecurity:

- An introduction to the functioning of generative AI
- Benefits of using AI in cybersecurity
- Innovative use cases that go beyond the detection of malicious activities

15:10

Speech: let's ask the tough Question: How do you motivate users?

- The proven science behind incentives as a motivational tool
- What's needed to make them work effectively
- The three key principles that should form the base of any security training program KnowBe4

15:40 Networking break

16:10

&

Case: data protection

- How can we cover staffing & data protection needs during a major cyber incident?
- Service provider? Community? Leverage synergies with Integration possibilities between DP and InfoSec.

16:45

&

Case: cyber security leadership principles

- The mission tactics & situation presentations for a common understanding of the cyber situation
- Concept of inner leadership for more trust, respect and appreciation.

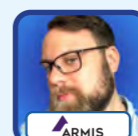

17:20

Speech: artificial intelligence

New threats and opportunities through AI in cybersecurity

17:55

Speech: from complexity to simplicity

Overcoming fundamental security challenges

08:30

Opening

Moderation: learnings of day1
Benjamin Bachmann CISO

08:35

Gideon Knocke
CISO

David Steng
Director Cyber Risk

Case: cyber economics, funding & investments

How do you combine the innovation and agility of startups with the requirements of a corporation

- Challenges in cooperation
- Negotiating properly
- Check sensibly
- Collaborate

09:10

Christoph Engels
Information Security Specialist

Florian Hübner
Europas grösster KI Influencer

Case: AI

- An even more secure business through integration of AI
- Practical examples commented by the department
- Clear AI strategy & the right tools more innovation, efficiency & sales.

09:45

Christoph Dittmann
Senior Solutions Engineer

Speech: data

- Log optimization
- Threat intelligence enrichment
- Security pipeline for preprocessing

10:15

Networking break

10:45

Maik Wetzel
Strategic Business
Development Director DACH

Speech: NIS2

NIS2 - implementation in Germany - curse or blessing?

11:20

Patrick Steinmetz
Sales Manager

Speech: Resilience in the supply chain: cyber risk as part of overall supplier risk management

- Understanding the threat landscape
- Building cyber resilience
- Collaborative approaches and risk mitigation
- Implementing effective risk management for third parties

11:55

Heinz Mäurer
Security CE

Speech: preventive endpoint security - time for a new approach to security

IT security - a general view

- Security investments vs. success
- New goals, old goals rediscovered

Closing the Gap mit HP Wolf Security

12:25

Lunch

08:30

Opening

Moderation: learnings of day1
Swantje Westpfahl CEO

08:35

Christian Bestehorn
Leiter IT

Stefan Rössel
CEO

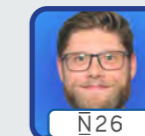

Case: pentesting and IT-security in legacy surroundings

- How can I discover and close security gaps in legacy systems without endangering production?
- What IT security measures can I take without having to make major interventions?

09:10

Rouzbeh Barzegar
Director of Information Security Management

Max Imbiel
Co CISO

Case: security recruiting

- How do I get the best & how do I recognize them?
- Internal recruiting through further training
- A-level employees with a can-do mentality without a record salary

09:45

Alexander Busshoff
Solution Architect

Speech: zero trust framework - from ideation to implementation

This presentation will delve into the concept of Zero Trust, its importance in ensuring enterprise security, the challenges organizations face when implementing it, and practical strategies for successful implementation.

10:15

Networking break

10:45

Andreas Nentwich
Enterprise Account Manager

Speech remote access challenge - has VPN had its day?

- External remote access without the use of traditional VPN solutions
- Control access to critical infrastructure
- Restrict the use of privileged accounts

11:20

Eileen Walther
General Manager DACH

Speech: Strengthening Resilience: Mastering the Mental Challenges of Cyber Incidents

With this session, you will gain unique insights into the visible and invisible mental impacts of cyber incidents. Companies will receive practical approaches at the intersection of psychology and cybersecurity to enhance their own resilience.

11:55

Rene Siekermann
Enterprise Solutions Engineer

Speech: AI security in the cloud context

Builder and defenders, together at last: Strategies for embracing the new cloud operating model.

12:25

Lunch

13:25

Corinna Klempt
Senior Expert
Human Risk

Mastermind: awareness

- The campaign quick check: Where are you, how are you moving forward?

14:15

Sebastian Dännart
Director IT Security Consulting

Speech: CISO – Chief Information Stakeholder

- As a CISO, who do I actually have to drink coffee with and how much coffee?
- How many balls do I have to be able to juggle at the same time?

14:50

Benedikt Stürmer
Projektmanager

Speech: bestzero! The modern app access for remote work.

- Dedicated access for individual applications.
- Significant reduction of cyber threats.
- Time-saving, cost-efficient, flexible.

15:20

Networking break

15:40

Rainer Rehm
CISO

Julia Dudenko
CISO

Case: budget

- How do I get enough budget in times of recession?
- Cyber @ Board – which key figures and reports are important and which ones are desired?
- Balance between requirements & financing

16:15

Michael Schrank
CISO

Stefan Baldus
CISO

Case: SOC

- Structure internally - externally
- Requirements for employee skills, operations, vulnerability management
- Establishment & further development structure internally

ab 16:45

Stadium tour

Networking

Community

13:25

Tobias Klatzka
Lead Technical Consultant

Speech: collect, detect, react

NTT DATA Managed Security Services - increase your level of security!

14:15

Christian Schramm
Sales Engineer

Speech: NIS-2: only compliant or also secure?

NIS2 poses enormous challenges for many companies.

- How can the requirements be implemented quickly (time-to-value)?
- How can NIS2 be used to react flexibly to future challenges?
- How can costs be saved despite NIS2?

14:50

Steve Benton
FCIS CISSP | VP Anomali
Threat Research & GM

Speech: the expanding role of generative AI in accelerating elite SOC performance

The application of NLP and AI in CTI and SOC operations, specifically in the context of understanding, detecting, operationalizing, and reporting external threats against internal telemetry. They play a central role in enhancing SOC performance to elite levels.

15:20

Networking break

15:40

Oliver Rother
CISO

Florian Jörgens
CISO

Case: awareness

- Does Zero Trust make every employee a suspect?
- Awareness, from owner to employee
- Tips and lessons learned from successes and mistakes

16:15

Corinna Klempt
Senior Expert
Human Risk

Horst Moll
CISO

Case: ChatGPT

- What does AI mean for the company?
- What will change for CISOs and employees?
- Benefit from AI, despite the dangers, but how?
- Examples from practice
